

README

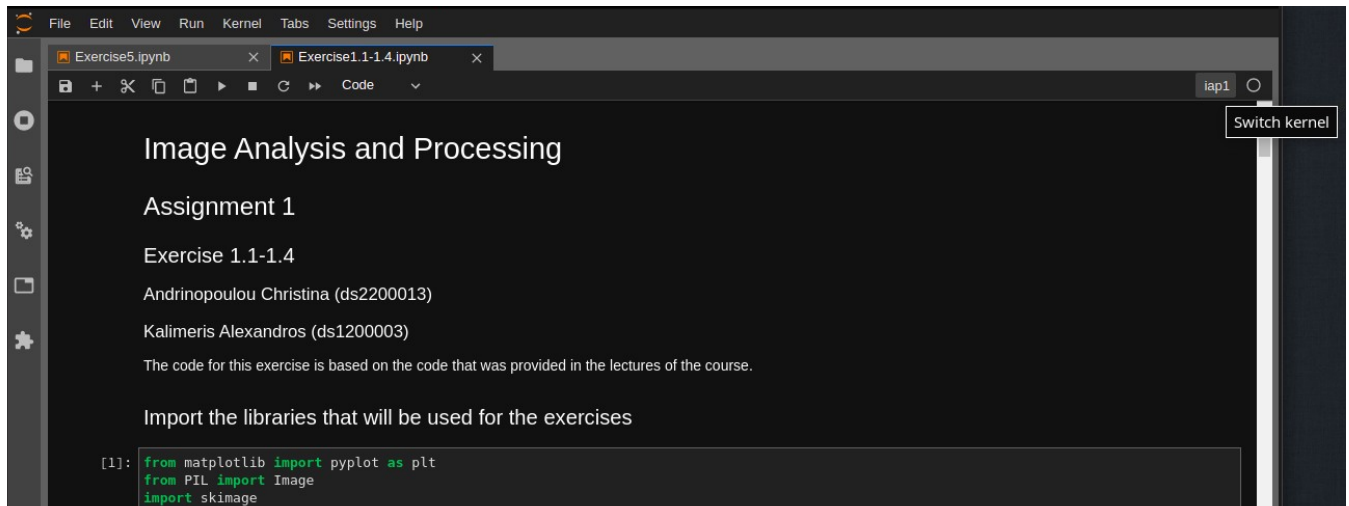

For the execution of the two python notebooks, please follow the instructions below:

1. Move into the directory, which contains the code.
2. Execute the commands below:

```
$ conda env create -f enviroment.yml  
$ conda activate iap1  
$ jupyter lab
```

3. Wait until the jupyter lab is ready.
4. If the kernel is not set to be the kernel “iap1”, change the kernel.

5. Run the notebook.
