

README

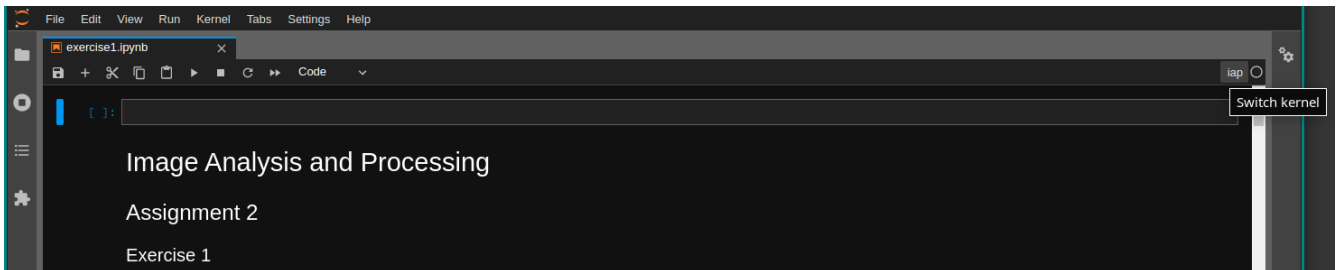

For the execution of the two python notebooks, please follow the instructions below:

1. Move into the directory, which contains the code.
2. Execute the commands below:

A terminal window with a dark background. At the top left, there are three small white circles. Below them, three lines of text are displayed in a monospaced font. The first line is '\$ conda env create -f environment.yml', the second is '\$ conda activate iap', and the third is '\$ jupyter lab'.

```
$ conda env create -f environment.yml
$ conda activate iap
$ jupyter lab
```

3. Wait until the jupyter lab is ready.
4. If the kernel is not set to be the kernel “iap”, change the kernel.

5. Run the notebook.
